EXPERIENCE

Airbus Defence & Space

August 2026 - Present

Permanent position - DevOps & Deployment Engineer

France

- Deploy and integrate AGNET (MCX) critical communications platforms in virtualized Linux environments.
- Provision VMware infrastructure with Terraform; automate installation and configuration with Ansible and shell scripts.
- Configure network connectivity and services, validate deployments, and troubleshoot infrastructure and application issues.
- Document deployment procedures and improve their repeatability for platform installation and maintenance.

Airbus Defence & Space

February 2026 - May 2026

Full-time internship - Cybersecurity Engineer (A400M Programme)

Getafe, Spain

- Supported A400M maintenance systems: PKI, certificate lifecycle and SmartCard authentication in Active Directory.
- Configured and troubleshoot IPSec VPNs and NAT on FortiGate devices to interconnect maintenance systems.
- Worked with OpenShift on VMware and automated deployment and SSH configuration with Ansible.

Airbus Defence & Space

August 2023 - August 2026

Apprenticeship - Software Engineer

Paris, France

- Developed a Java MBSE plugin for CAMEO used by 500+ Airbus engineers, adapting it to systems architects' needs.
- Set up and maintained the project's CI/CD pipeline with Jenkins, Docker and Git; used Jira and Confluence.

Kardham Digital

September 2022 - August 2023

Apprenticeship - Developer, Assistant Digital Project Manager

Paris, France

- Built full-stack R&D solutions for occupancy forecasting, IoT and space optimization using Python, Django REST, JavaScript, C# and Java.
- Analyzed building data with SQL, Pandas, Streamlit and Elasticsearch to produce client reports and visualizations.

Kardham Digital

June 2022 - August 2022

Internship - Assistant Digital Project Manager

Paris, France

- Supported IT projects using Scrum and deployed routers, firewalls, switches and connected devices at client sites.
- Administered Debian servers and hosted web applications with Apache2.

Université Paris Cité

October 2022 - Present

Fixed-term contract - Student Tutor

Paris, France

- Weekly classes and tutoring for the university's disability section.

EDUCATION

Université de Technologie de Compiègne (UTC) - Sorbonne

June 2026

Engineering degree in Software Engineering (Master's level), overall GPA: 5/5

OOP, software design, algorithms, data structures, operations research and combinatorial optimization

Université Paris Cité

June 2023

DUT in Computer Science (two-year technical degree), valedictorian

TECHNICAL SKILLS

DevOps & Infrastructure

Terraform, Ansible, GNU/Linux, shell scripting, VMware/vCenter, Docker, OpenShift

Deployment & CI/CD

AGNET / MCX, Git, Jenkins, network configuration, troubleshooting

Cybersecurity

PKI, certificates, SmartCards, Active Directory, IPSec, FortiGate, hardening, IAM

Programming

Java, Python, C#, C, C++, Swift, Objective-C, JavaScript, HTML, CSS, VB .NET

Data & Collaboration

SQL, Pandas, Streamlit, Elasticsearch, Jira, Confluence
