EXPERIENCE

Airbus Defence & Space

February 2026 - May 2026

Incoming full-time internship – Cybersecurity Engineer (A400M Programme)

Getafe, Spain

- 4-month cybersecurity mobility to support A400M maintenance operations at the Getafe (Spain) production site.
- PKI, certificate lifecycle, and SmartCard authentication within a Windows Active Directory domain.
- IPSec VPN design/troubleshooting and NAT on FortiGate devices to secure and interconnect maintenance systems.
- OpenShift on VMware and Ansible automation (including SSH configuration) to standardize deployments and operational procedures.

Airbus Defence & Space

August 2023 - Present

Co-op - part-time — Software Engineer

Paris, France

- Enhanced and evolved a Model-Based Systems Engineering (MBSE) plugin on CAMEO software, implemented in Java and utilized by numerous Airbus engineers (+500).
- Spearheaded Continuous Integration/Continuous Deployment (CI/CD) setup and oversight for the project, embracing DevOps practices with Jenkins, Docker, Git, Jira & Confluence.
- Optimized MBSE system to precisely align with architect requirements, ensuring seamless MBSE utilization.

Kardham Digital

September 2022 - August 2023

Co-op - part-time - Developer, Assistant Digital Project Manager

Paris, France

- Development of full-stack solutions using Python, HTML, CSS, JavaScript, C#, Java, and Django REST API.
- Completion of projects for the Research & Development department at Kardham (presence forecasting, IoT development, space optimization, building data analysis).
- Data analysis using SQL, Pandas, Streamlit, and Elasticsearch to provide building life statistics as well as customized graphs based on client requests.

Kardham Digital

June 2022 - August 2022

Internship - Assistant Digital Project Manager

Paris, France

- Participation (BUILT & RUN) in the monitoring of IT projects (project management with SCRUM).
- Traveling to client locations throughout France to organize the deployment of IT infrastructure projects: installing routers, firewalls, switches, sensors, and connected lights.
- Administration of systems and hosting of websites/projects using Apache2 on Debian servers.

Université Paris Cité

October 2022 - Present

Fixed-term contract - Student Tutor

Paris, France

- Weekly classes and tutoring for the university's disability section.

EDUCATION

Université de Technologie de Compiègne (UTC) - Sorbonne

June 2026

Master in Software Engineering

Overall GPA: 5/5

Specializing in OOP, Design, Algorithmics, Data Structures, Operations Research & Combinatorial Optimization

Université Paris Cité

June 2023

DUT in Computer Science (Two-year technical degree)

Valedictorian

TECHNICAL SKILLS

Programming Languages

Java, Swift, Objective-C, C#, C, C++, Python, JS, HTML, CSS, VB.NET

Systems

GNU/Linux, Windows domain basics, server environments, shell scripting, Ansible (SSH)

Cybersecurity

PKI/Certs/SmartCards, IPSec/FortiGate, hardening, IAM, crypto (A400M)

Tools

Git, Docker, Jenkins, OpenShift, VMware, Ansible, Jira, Confluence, Vim
